

Research project 2007/2008

Contemporary Sciences and Technologies

"Ethics and information technology"

Coordinator MA Mentor Hamiti

Advisor Prof. Dr. Asllan Bilalli

This project represents the initiative for raising the ethic level within SEEU staff and students during the usage of information technologies.

The objective of project will be preparation and publication of one university text, which will serve for knowing closer IT ethic norms, like: intellectual authorship, anonymity, privacy, plagiarism, etc. As well will be incorporated legislative explanations related to respective definition, based on existing laws of RM, in order to clear the rights and IT obligation. In addition to work it will added eventual concrete cases that will result form the research factual situation SEEU.

Result of the project will present contribution of evaluation, avert of negative phenomenon present on our society, like coping, plagiarism, violation of authorship right, etc.
