

Research project 2007/2008

Languages, Cultures and Communications

"Measuring cultural awareness in foreign language teaching"

Coordinator MA Agim Poshka

Advisor Prof. Dr. Ferid Muhic

The research project will aim to measure the cultural impact that different teachers have in the process of teaching English as a foreign language. The research will be conveyed with students of the Language Centre and the English Language Department of SEEU and the "S. Cirilius and Methodius University" in Skopje. In this process we would attempt to see do Macedonian teachers have larger Cultural impact on Albanian Students or Albanian teachers have a larger impact on Macedonian Students. There will also be a third independent group that will measure the culture impact that English Native speaker have on our local students at SEEU. In order to gain an international perspective on the field the project co-ordinator has already been accepted as a participant in a relevant conference related to Cultural issues in TEFL.

Milestones:

Trying to define is Language Teaching also Culture Teaching?
